Work Experience

Project Associate | IC&SR, IIT Madras (Under UHG Optum) **08/2025 - Present**
Chennai, India (Remote)

- Developing a pipeline over unstructured EHR discharge reports to build a domain-specific medical LLM and construct knowledge graphs to improve the efficiency of question answering.

Research Internship | Indian Statistical Institute **02/2024 - 03/2024**
Kolkata, India (Remote)

- Developed a frequency-domain based generative framework for hyperspectral image classification, achieving 95.52% (Pavia) and 99.05% (Salinas), outperforming state-of-the-art models like SpectralDiff.

Projects

clawss package | FastAPI, React, TypeScript, PyTorch, Ollama/OpenRouter. **05/2026**

- A browser-based modular notebook environment where each cell behaves like a Python file with isolated namespaces and cross-cell imports. Added a dependency graph for understanding cell dependencies, and visualization for inspecting PyTorch model architectures. Designed notebook-aware AI generation using either local Ollama models or the user's own API keys.

Cross Hyperspectral and LiDAR Attention Transformer | PyTorch **08/2023**

- Implemented the codebase for the paper "Cross Hyperspectral and LiDAR Attention Transformer: An Extended Self-Attention for Land Use and Land Cover Classification" translating the proposed methodology into a working implementation.
